PROFESSIONAL SUMMARY

Data Analyst & AI/ML enthusiast skilled in Python, ML, NLP, Power BI, and Tableau. Built end-to-end pipelines for sentiment analysis, churn prediction, and sales forecasting — delivering insights through interactive dashboards. Skilled in regression, classification, clustering, A/B testing, and stakeholder communication.

INTERNSHIP

AI/ML Intern – InternPe

Aug 2024 – Sep 2024

Built end-to-end ML pipelines using Python, Scikit-learn, and Pandas — preprocessing real-world datasets and training classification models with 85%+ accuracy.

Collaborated cross-functionally to translate business questions into analytical solutions, delivering data-driven insights to stakeholders.

EDUCATION

Bachelor of Computer Applications (BCA)

2023 – 2026

CGPA: 8.24 / 10.0

HSC — Science Stream

Feb 2023

79.33%

CERTIFICATIONS

Generative AI Foundations – upGrad & Microsoft

AI for All – Intel & Digital India (Ministry of Electronics & IT)

TECHNICAL SKILLS

Programming: Python, SQL (MySQL)

Libraries: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, NLTK

ML / AI: Logistic Regression, Classification, NLP, TF-IDF, Sentiment Analysis, TensorFlow, XGBoost, Regression (Linear, Multiple), Clustering (K-Means, DBSCAN), Decision Trees

Visualization: Power BI, Streamlit, Excel (Advanced), Tableau

Tools: Git, GitHub, VS Code, Jupyter Notebook, Google Colab

Concepts: Data Cleaning, ETL, Dashboards, Business Intelligence, Statistics, APIs, A/B Testing, Hypothesis Testing, Data Storytelling, Stakeholder Communication

PROJECTS

Sentiment Analysis of Social Media Content

Built an end-to-end ML pipeline using Logistic Regression + TF-IDF to classify social media posts (positive / negative / neutral) with reliable accuracy.

Designed a real-time web interface using Streamlit and React.js for live sentiment visualization and insight dashboards.

Customer Churn Prediction

Analyzed customer behavioral data with Pandas/NumPy; performed data cleaning, feature engineering, and EDA.

Trained a Random Forest classifier to predict churn (85%+ accuracy) and built an interactive Power BI dashboard highlighting key risk segments for stakeholders.

Sales Forecasting & Analytics Dashboard

Built an ETL pipeline to clean and structure multi-source sales data; developed time-series forecasting model.

Delivered a Power BI dashboard visualizing monthly trends, top products, and regional performance to support business planning decisions.
